FUTURE DEVELOPMENTS

Explore "consulting +", and accelerate transformation from the "offline" to "online" service model

During the era of Internet 2.0, the offline-to-online business integration becomes increasingly evident. To address such integration, the Group will build a business innovation platform based on big industrial data by integrating our diversified "service" and massive "data" with our powerful "platform" through our "Chanyetong APP Platform" ("Chanyeton") as well as centering on the development of Chanyeton. Moreover, the Group will speed up its service model reform from annual report to membership subscription.

Explore the "consulting +" to expedite transformation from the "project-driven" to "service-driven" business model

Firstly, our industry planning segment will expand from planning to campaign organization, investment attraction, application and registration, and custodianship. By amassing elements required for our industrial development, we will complete our transformation from the "planning consulting" to the "integrated services". Secondly,

our corporate strategy segment will evolve from research to competition, strategy, listing, and mergers and acquisitions. The corporate innovation resources will enable us to change our business offering from the “management and consulting” to the “strategic services”. Thirdly, our investment and financing segment will expand its scope from due diligence to fund-raising, investment decision-making, fund management, and index, thus completing transformation from the “project achievement system” to the “revenue generation system”. Lastly, our information business segment will expand its scope from planning to public-private-partnership (PPP), investment, construction, and operation. The planning and operation of the intelligent city strategy will allow us to complete shifting out industry chain pattern from the single-sided planning to the “comprehensive planning+ partnership-driven execution” for our projects.

Explore “Consulting +” to expedite transformation from “data-based” to “index-based” product creation

We will focus on most concerned issues in the industry. In addition, we will reconstruct data-based and index-oriented product systems by upgrading CCID Top 100, CCID Trends, CCID Cases, CCID White Paper, CCID Data and other data products to index products with industry investment value and regional development potential. By so doing, we will shift from data-based products to index-based products.

Explore “Consulting +” to expedite transformation from “closed” to “open” capacity development

To build an open value network with the Company as a platform, we will consolidate and integrate knowledge, policies, channels, capital, markets and other resources. By creating a positive cycle of appreciating resources, our corporate platform will help the Company ultimately achieve various targets, including revenue from projects, services, investments, and real estate.
